

GEOELEC Proposal

Creation of National Geothermal Committees

Regional Workshop UK-Ireland - Iceland

Philippe DUMAS

European Geothermal Energy Council

London, 26/09/2011

Promote Across the EU: Creation of National Geothermal Committees

Example from France

July 2010: Energy Ministry launched a 'Comité National de la géothermie' to propose actions and recommendations for a geothermal development in France.

Composed by 35 members from 5 different sectors:

- State level
- Local authorities
- NGOs
- Employers
- Workers

Meet regularly (every 2 months)

Secretariat managed by the Ministry

First Results

- 3 First key actions:
 - Simplifying administrative procedure and quality
 - Training professionals
 - Disseminating information
 - 2 Key objectives:
 - Multiply the geothermal production by 6
 - Create 80 000 jobs in the geothermal sector
- **Consolidate French position as a leading geothermal country**

Feedback from 1 member (C. Boissavy, President AFPG)

- Opportunity for professionals of the geothermal sector to:
 - Speak directly with the State
 - Dialogue with the « Greens » and with representatives from the Civil Society
 - Trade unions and consumer associations are the most motivated
 - Need a high level person as President

GEOELEC Project Goal

- Make a proposal to Energy Ministries and National Energy Agencies
- See the creation of such a Committee in 4-5 countries during the next 30 months

Thank You!
